March 2014

# Presentation

The Water Information Systems (WIS) is a platform for the organization of production, collection, storage, valorisation and diffusion data. The WIS has a dual mission: To disseminate public information and report important indicators for decision-making at national level. The Moroccan Association of Young Geomatists, in partnership with the Faculty of Sciences of Rabat and the University Mohammed V Agdal, organizes a scientific meeting on the theme "*Mediterranean Water Information Systems*" The purpose of this meeting is to present an overview of the WIS on the Mediterranean basin and prospects in this area.

## Themes

- Technologies
- Life cycle of water
- Risk Management, Decision Making and Awareness
- Mobility and Real-time tracking
- International experiences

## Honorary Committee

- Lahcen Daoudi: Ministry of Higher Education and Scientific Research
- Hakima El Hiti: Delegate-Ministry for Environment.
- Charafat Afilal: Delegate-Ministry for Water.
- Wail Benjeloun, President of Mohammed V Agdal University.
- SAID AMZAZI, Dean of the Faculty of Sciences - Rabat
